

# Hydromat is pleased to introduce a Brand New Productivity Enhancement Company...

## yet, it's already 20 years old... hmmm...curious.

**FMB**  
Machinery  
Turbo 3-36

FMB offers a full line of bar feeders for Swiss Turning, Fixed Headstock and Multi-Spindle lathes. Manufactured to the highest quality specifications, these bar feeders are smartly designed, robust in construction and backed by a team of service personnel second to none. Now known as Edge Technologies, this group of dedicated professionals stands ready to show you a better way to feed stock, the FMB way.

Located on the Hydromat Campus in St. Louis, Missouri, Edge Technologies boasts one of the most experienced staffs in the industry.

If you are in the precision metal cutting industry you probably already know our reputation for superior service and support. You've had the pleasure of being sold products by a true professional. That has not changed.

Now we have a new name, a new focus and a new purpose. We will offer our customers the finest products available for productivity solutions and advancements. Our service and support will be second to none. That's our pledge to you. Take us up on it.
